⊟ Add a database

[+ Create dev database]   [+ Attach DigitalOcean database]

Have an external database? Use environment variables to connect.

App-level environment variables   Edit
All resources access these variables. A resource variable with the same key will override an app-level value. Get guidance on configuring variables 🗎

No environment variables

Datacenter region
Pick a datacenter closest to your end users. Static components are served on our Global CDN 🗎

Choose a datacenter region

🇺🇸 New York • Datacenter 1 • NYC1   ⌄

☐ Connect app to VPC network

Finalize

Choose a unique app name*
Names must be in lowercase. They can be between 0 and 32 characters long and may contain dashes.
